PROFESSIONAL EXPERIENCE

Laravel Developer
Binstellar Technologies Pvt Ltd

Jan 2024- Present
Ahmedabad, Gujarat

Responsibilities:

- Developed and maintained dynamic web applications using Laravel, ensuring clean and efficient code.
- Collaborated with the team to design and implement RESTful APIs for various projects.
- Optimized database queries and implemented caching mechanisms to enhance application performance.
- Contributed to debugging and resolving complex backend issues, ensuring stability and scalability.
- Worked closely with clients to understand requirements and deliver customized solutions.

PROFILE SUMMARY

- Skilled Laravel Developer focused on building scalable web applications and enterprise management systems.
- Experienced with the TALL stack — Laravel, Livewire, Tailwind CSS, and Alpine.js.
- Proficient in backend development using PHP and database management with MySQL.
- Hands-on experience with external API integrations, including WhatsApp messaging services and third-party platforms.
- Implemented AI-powered chat support and automation features using modern AI models.
- Efficient in using AI-assisted development tools and modern IDE workflows to accelerate development and improve code quality.

PROJECTS

Hostel Management System

Tools: Laravel, MySQL, Tailwind CSS

- Designed and implemented a console-based student management system to handle student registrations, grades, and course enrollments.
- Developed a menu-driven interface for easy navigation and operations.
- Used File Handling to store and retrieve student data persistently.

Crystal Event CRM

Tools: Laravel, MySQL, Tailwind CSS

- Developed an event management system to plan and organize various events seamlessly.
- Enabled features for clients to book events, manage guest lists, and track event expenses.
- Integrated automated email notifications for bookings and updates.

Mineral Industry ERP

Tools: Laravel, MySQL, Tailwind CSS

- Developed a complete industrial management system covering sales, purchase, and financial operations.
- Built modules for handling orders, invoices, debit notes, lab testing, and transport tracking.
- Added multi-site support, GST workflows, and detailed business reports for smooth operations.

Refill Tank ERP

Tools: Laravel, Livewire, Tailwind CSS, Alpine.js, MySQL

- Built an industrial ERP platform for refill tank manufacturing and distribution operations.
- Developed HRMS features including employee management and punch-based attendance tracking.
- Implemented sales, purchase, dispatch, and inventory management modules.
- Added barcode generation for tank/cylinder identification and stock tracking.
- Automated dispatch workflows and operational reporting.
